WEEE Directive

Dear Sir or Madam,

The WEEE Directive 2012/19/EU regulates the distribution, return and proper disposal of waste electrical and electronic equipment within the European Monetary Union. It came into force on 13 August 2012 and represents an amendment to the WEEE Directive 2002/96/EC. The abbreviation WEEE stands for 'Waste Electrical and Electronic Equipment'. The WEEE Directive is transposed into national law by the respective EU Member States. In Germany, this is done by the Electrical and Electronic Equipment Act (ElektroG). The WEEE Directive and the Electrical and Electronic Equipment Act thus work hand in hand.

We hereby confirm that the products manufactured by LAMTEC GmbH & Co. KG are excluded from this, as they are subject to the exemption provisions of Section 3(16), (17) and (18) of the ElektroG and Section 2(2).

- Section 3(16): stationary large industrial tools
- Section 3(17): stationary large industrial equipment
- Section 3 No. 18: mobile machinery

Section 2 (2): devices that are installed as parts in another device that is exempt from the scope of this law or does not fall within the scope of the law, and can only fulfil their function specifically as parts of this other device.

Please do not hesitate to contact us for further information or more specific evidence.

Yours sincerely,

LAMTEC GmbH & Co. KG
