

LAMTEC IGNITION TRAINING

The LAMTEC gas burner igniter GFI ignites your main burner to support your main burner flame or can be used flexibly to preheat the system. The GFI is user-friendly and can be used for all fuels and gases. A large and stable output- and setting range is available.

LAMTEC HEI high-energy igniters are fuel-independent igniters and can be used to ignite the main burner. From basic to high-end applications, HEI is characterized by its ease of use and flexibility with all gaseous and liquid fuels.

The half-day training course deals in detail with the GFI 35, 48, 70, 89 gas burner igniters and the HEI500 and HEI600 electric high-voltage igniters.

DATE: 22. October 2027

START / END: 8:30 am / 12:00 noon

Please note: Admission at 8:00 am at the earliest!

For organizational reasons, we ask participants to register at our reception desk on the first day of training.
