

Scholarship, an Ease to Many from University Anhalt.

This year, LAMTEC is participating again in sponsoring the German Scholarships at the Anhalt University of Applied Sciences. The German Scholarships are there to support talented and engaged young people to manage their studies during difficult times. Many companies are taking the opportunity to connect to these future skilled professionals at an early stage. Thanks to this institution, 46 students who received 300 Euros per month (from the Federal Government and Sponsors) can manage their studies at ease for the next two semesters.
