

LAMTEC CMS training

Whether it be a standard industrial combustion or complex process application, LAMTEC's revolutionary CMS Burner Management System sets new standards in control automation.

The 2-day Combustion Management System (CMS) training focuses exclusively on this revolutionary burner and plant control system. CMS means "Combustion Made Simple".

Date: 25.-26.06.2024

Location: Hilversum, Netherlands

Start/End: 08:30am /5:00pm

Content:

- Comparison LAMTEC burner control ETAMATIC/FMS
- Remote Software
- Module management
- IO-Matrix
- GUI/UI
- Programming curves
- Digital inputs and outputs
- Analog inputs and outputs
- Setting parameters

Technical requirement:

- Laptop with Windows operating system
- Administrator rights to install drivers and software required for training.
- possibility to change IP address
- Programs can be provided in advance, please indicate when registering
